Rovabio® *Advance*

THE REVOLUTION IN FEED DIGESTIBILITY

Preferendum

The next generation of enzyme improving
the overall feed digestibility

Profitability

Reliability

Sustainability

Rovabio® ADVANCE improves the overall feed digestibility, enabling unmatched profitability in feed and animal production. The efficacy of Rovabio® ADVANCE is based on an innovative profile of fibrolytic enzymes that ensures optimum degradation level of non-starch polysaccharides. Rovabio Advance improves the availability of all nutrients in the feed, such as amino-acids and phosphorus, and increases its metabolizable energy.

ROVABIO® ADVANCE: THE ONLY FEEDASE
